Dear Sir/Madam,

Dr. Margaret Carter has worked with my son and our family for ten years. Our son is very unique, gifted and quite challenging, but also had very high social-emotional needs. Without Dr. Carters' amazing support, knowledge and programs, inclusion at any school would never have been possible. This also is the case with my sons' inclusion in the wider community. Without her support, my son would not have reached his potential at school or be the happy person he is today. Any programs or workshops Dr. Carter is involved in will be incredibly beneficial to any parent.

Yours sincerely,
Debbie Walters
