

TO WHOM IT MAY CONCERN

February 2005

I am writing to acknowledge the support and guidance that Dr Margaret Carter gave to my son, diagnosed with Asperger Syndrome, in particular his primary school years. Dr Carter was always willing to mediate in challenging situations, and she had a genuine concern for my son's well being. Not only did Dr Carter take great interest in my son's journey, but also she was a wonderful support to his family. I am definite that her earlier intervention with my son has lead to his later successes. Her professionalism and political correctness is admirable.
